DETAILED ACTION

Amendment

1. Applicant's submittal of an amendment was entered on 11/8/04, wherein:

claims 1-12 and 19-25 are pending and

claims 1 and 19 have been amended.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-12 and 19-25 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,768,521 (hereinafter "Dedrick").

Dedrick discloses a method in a computer system for logging data wherein the system meters and records the flow of electronic information (see column 3, lines 60-65) and bills the customer based on content data type (i.e. text and video; see column 4, lines 26-38; see also paragraph bridging columns 4-5). The data is processed and recorded via protocols at the session level (via session manager 38; see column 3, lines 46-59). The system records time information (see column 4, line 65) and source information (see column 5, line 51 - column 6, line 14) and advertisement information (see column 5, line 51 - column 6, line 14). The system further utilizes computer resources (12 and 14) including a central processing unit and memory.

Response to Arguments

4. Applicant's arguments filed 11/8/04 have been fully considered but they are not persuasive.

On page 5, first full paragraph, Applicant argues that Dedrick fails to disclose "selecting a sequence of components for processing the transferred data." The Examiner respectfully disagrees. Dedrick discloses processing various types data including as an example, text and video (see column 4, lines 30-35). Different types of data inherently require conversion components during data processing. Furthermore, Applicant argues that Dedrick does not disclose recording an amount of data processed by each component. The Examiner respectfully disagrees. In the paragraph bridging columns 3-4, Dedrick discloses a metering processing for recording an amount of data processed by each component.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the

Art Unit: 3627

statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
